

Your Doctor's Orders are Paramount

De-Regulate Doctors and Your Healthcare Dollars

For more than a decade, the Docs 4 Patient Care Foundation's practicing physicians have used their working knowledge of the American health care system to develop the Physician's Prescription for Health Care Reform.

Over the past 3 1/2 years, the Trump administration has used all of its regulatory authority to improve health care quality, lower costs and offer more choices.

President Trump has consistently worked to eliminate regulatory red tape, remove the bureaucrats from the exam room, and free up doctors to practice medicine and care for all patients.

In almost every instance, those changes have paralleled our recommendations.

President Trump has tirelessly worked to invigorate American health care with innovation, transparency and choice. We appreciate the President listening to the medical experts for what is needed to fix health care and then implementing those reforms.
